MCS

10.6.2011

Version 5.xx

- **5.0.x:**
  - improved performance
  - improved servlet life-cycle diagnosis
  - animation feature (blinking, sound generation) for all Web2c widgets implemented
  - servlet type "Web2cGateway" implemented
  - bug fixes

- **5.1.x:**
  - Web2c: splash screen added
  - Web2c: early link registering
  - bug fixes

- **5.2.x:**
  - Web2c: user-defined component functionality extension (JAVA) feature added
  - Web2c: component attribute "expertComponent" added
  - bug fixes and code improvements

Web2c Component Extension

- Each Web2c component has its specific, pre-defined feature (e.g. a Web2cHisto component plots and updates a data array)

- *New:* The pre-defined feature can be overwritten or extended by providing a user-specific Java class (e.g. performing a Fourier analysis instead of displaying the raw data) implementing the Web2cExtension interface
