

CDI News

[New Features ...]

- CDI Version at 1.1.2
- Feature additions:
 - Scheduling data using BUS property 'RECV'
 - Now allowed IF scheduled with a CDI device
 - N.B. previously: could only schedule an 'extended property'
 - N.B. cannot schedule a group device contract
 - Contract using e.g. device = "BL_0.TEMP_OUT, BL_1.TEMP_OUT, BL_2.TEMP_OUT,..." will NOT work!
 - Bus plugs can operate in asynchronous mode
 - Notify CDI server of incoming data rather than CDI server polling the hardware.
