# Instant Client News

The screenshot shows the Java Instant Client interface. A 'Time Selector' dialog box is open, allowing users to specify a date and time. The date is set to August 29, 2017, at 17:52:54. The UTC value is 1504021974. A red arrow points from the 'UTC' field in the dialog to the 'Input Data Type' dropdown in the main window, which is currently set to 'INT32'. A red circle highlights a clock icon next to the dropdown. Below the dialog, the main window displays a table of data for the property 'LossRates.HIST' at the time 17:52:51.773. The table contains multiple rows of data, each with a value, date, and time in CEST. The status bar at the bottom shows 'Settings: UDP, Timer | Suppress Query Properties' and 'Last request: 17:52:52.42 (10 ms)'.

**Time Selector**

Day: 29, Month: August, Year: 2017  
Hours: 17, Minutes: 52, Seconds: 54  
UTC: 1504021974  
 Insert as UTC timestamp?  
Buttons: Now, OK, Cancel

**Java Instant Client**

Context: PETRA, Subsystem: ALL, Stock Properties, Meta Properties, A  
Server: BLM, Device: PU01I, Property: LossRates.HIST  
Data Size: 1000, Data Type: DBLTIME, local archived data for targeted device over time range, Timeout: 200

**Input Data Type**: INT32

time: 17:52:54 29-Aug-2017  
time: 17:53:21 30-Aug-2017

**Enter input data**

Timestamps can be entered in one of the following ways:  
timestamp -- the timestamp in utc seconds  
time: now -- current time as utc seconds  
time: -5d 6h 15 min 35 s -- now plus or minus the given time  
time: 7:45:22.123 -- today at 7:45:22 123 ms am  
time: 15 Jul 14:22 -- this year July 15th 2:22 pm  
time: 15.7.2010 14:22 -- July 15th 2010 2:22 pm  
time: 15072011 14:22 -- July 15th 2011 2:22 pm  
Other combinations are also possible, such as time first, date later etc.

**Post-Fix (TEXT Input)**  
 None  LF  CR  LF-CR

Settings: UDP, Timer | Suppress Query Properties  
Last request: 17:52:52.42 (10 ms)
