

# Beamline Alarm Info Display

(Visualisation of Hasylabalarms  
with TINE Software)

Yury Nechaev, Victor Soloviev  
MCS-1

# Flash Experiment Hall: Gas sensors

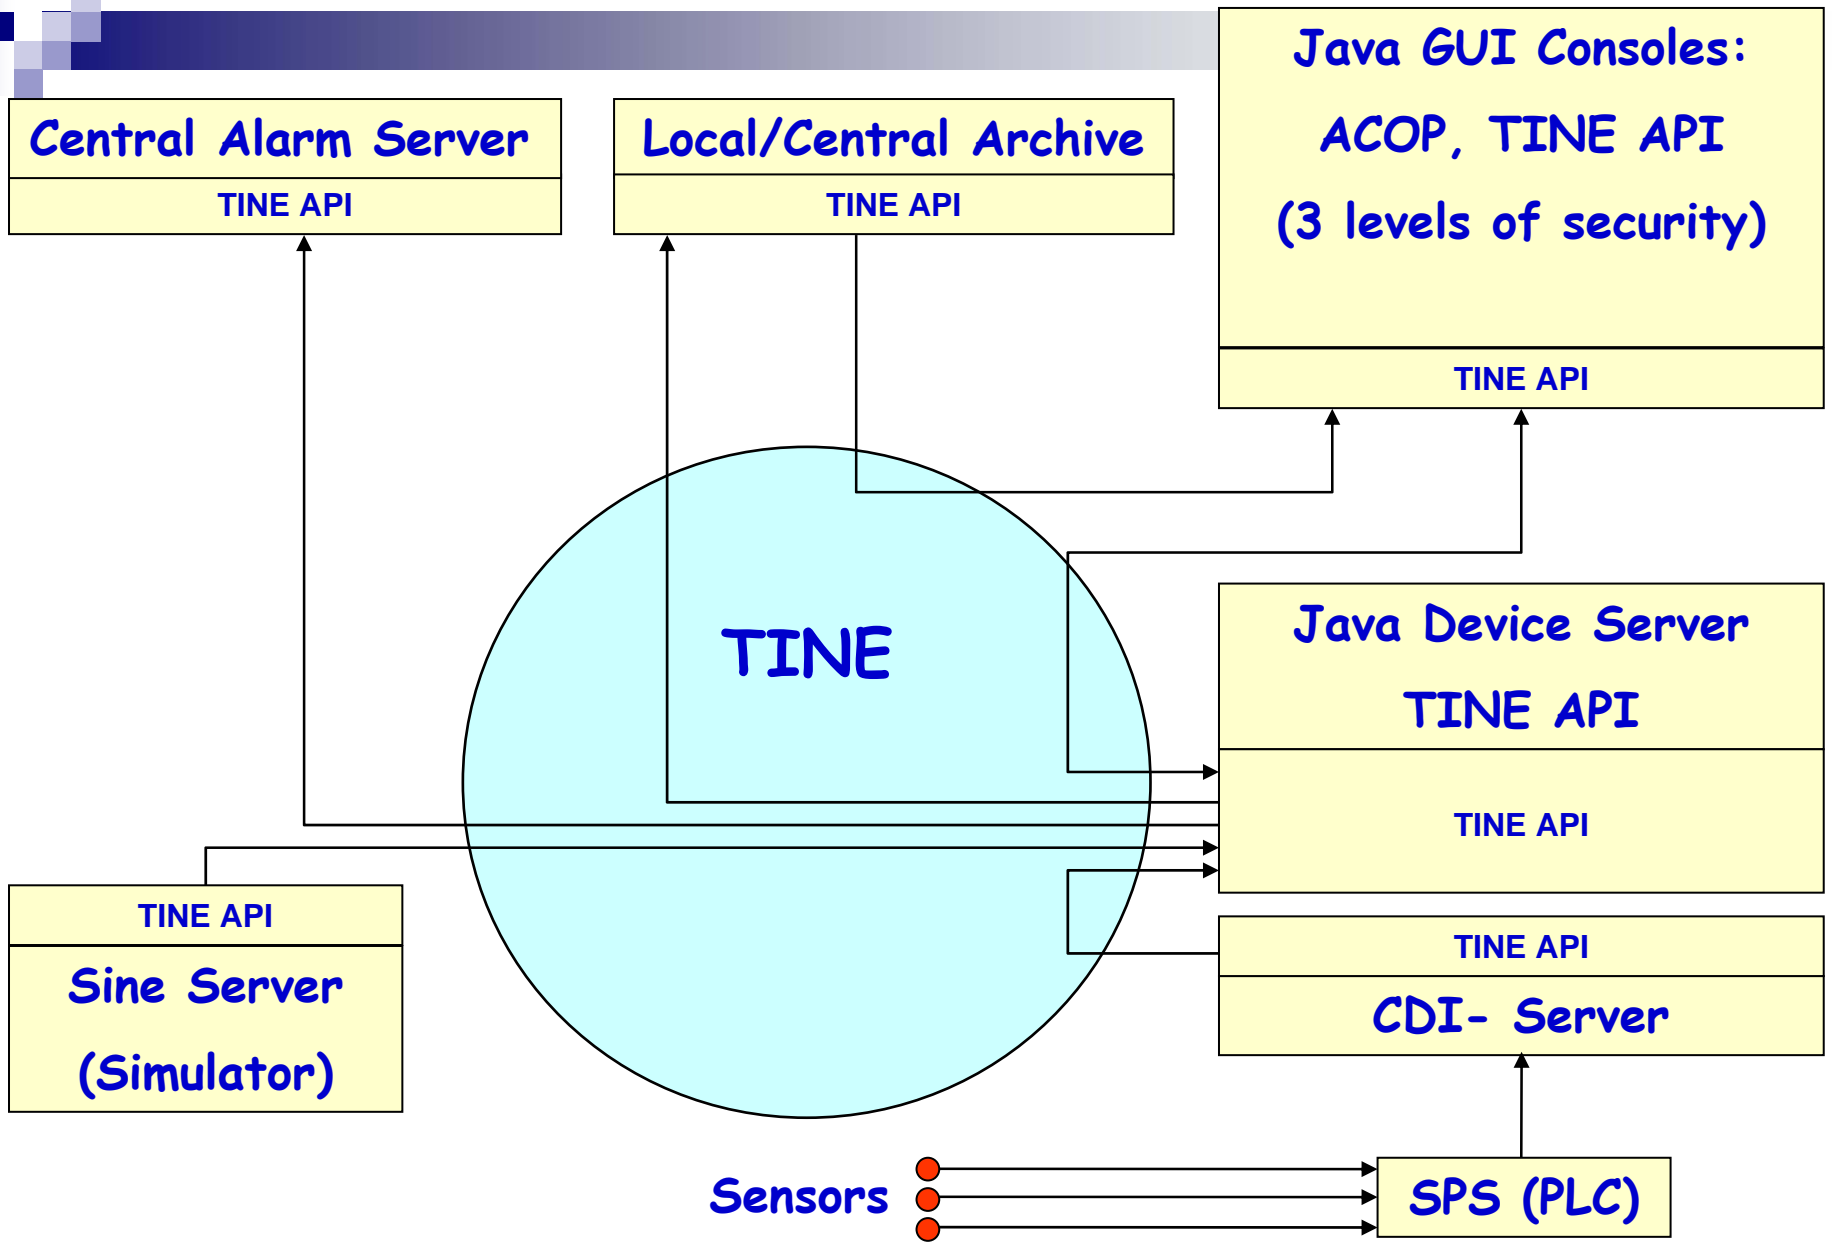

# Motivation

- The following alarms are to be visualize (in sum ~ 100):
  - Gasalarms (CO, H<sub>2</sub>, NO, H<sub>2</sub>S) – 24
  - Wateralarms – 13
  - Firealarms – 15
  - Gaspumps - 6
  - Commonalarms (Airpumpbreaks, Airpumps of  
Chemiealscases,...., etc) - 28
  - Urgent- Personnel Call
  - Urgent- Power Off

# Security demands:

- 3 Security levels:
  - **Common User (View-only mode)**: Needs no Password. The user can see all forms and accept Alarms.
  - **Shift Personnel & Technical Service (operating mode)**: received a Password. He can see all forms, accept Alarms and reset them, if the value of signal becomes below the Alarmlevel or if the reason of Alarm was removed.
  - **Administrator (Expert mode)**: He has in addition the full access rights to the software, e.g. sensors positions and Alarmlevels can be changed and/or new sensors can be added/removed.

SPS (Speicherprogrammierbare Steuerung) = PLC (Programmable Logic Controller )

Ready

## TINE Device Server (Java)

- Created with using the Deviceserver Wizard
- There is no need in GUI in this case (TINE API to communicate with the Client and CDI Server)
- Reads all initial data (Alarmlevels, sensors coordinates,...) from an ini-file
- Reads data from SPS via CDI-Interface (at the moment data are simulated by a Sine Server)
- Local Archiving & Central Alarm Service
- Generates Alarms for the Client Programs

# Exported Properties (27)

Name	Data Type	Size	Read/Write	Remarks
<u>GasConcentr</u>	float	24	Read	Gas concentrations
<u>VorLevels</u>	float	24	Read	<u>VorAlarms</u> levels
<u>HauptLevels</u>	float	24	Read	<u>HauptAlarms</u> Levels
<u>SetVorlevel</u>	float	2	Write	1 - <u>AlarmNb</u> , 2 - Level
<u>SetHauptLevel</u>	float	2	Write	1 - <u>AlarmNb</u> , 2 - Level
<u>AlarmsGr</u>	int	172	Read	Alarms (Graphic): 0 - no change 1 - begin of <u>VorAlarm</u> 2 - begin of <u>HauptAlarm</u> 3 - <u>Vor</u> => <u>Haupt</u> 4 - <u>Haupt</u> => <u>Vor</u> 5 - End of alarm
<u>AlarmsBin</u>	int	172	Read	Alarms ( <u>Betriebsmeldung</u> )
<u>AlarmNames</u>	NAME32	86	Read	Names of alarms
<u>CurAlarmsList</u>	int	172	Read	2*86: 1 - Current severity, 2 - Timestamp (begin)  Current severity: 0 - OK 1 - <u>VorAlarm</u> 2 - <u>HauptAlarm</u>
<u>SetBadSensors</u>	int	2	Write	Exclude sensor: 1 - <u>SensorNb</u> 2 - 1 to exclude, 0 - OK
<u>AllData</u>	byte	148	Read	Data from SPS (CDI)
<u>ReadSensorPos</u>	int	2	Read	Read sensor position: 0 - Group number 1 - <u>Button Nb</u> in the group
<u>SetSensorPos</u>	int	2	Write	Set sensor position: 0 - Group number 1 - <u>Button Nb</u> in the group
<u>ReadSensorX</u>	int	12	Read	X-Coordinates of sensors
<u>ReadSensorY</u>	int	12	Read	Y-Coordinates of sensors
<u>GetControlled</u>	int	86	Read	1, if the sensor is controlled 0, otherwise
<u>SetControlled</u>	int	86	Write	Set sensors to be controlled
<u>GasNames</u>	NAME32	24	Read	Names of gas sensors
<u>WasserNames</u>	NAME32	16	Read	Names of wasser sensors
<u>GasX</u>	int	24	Read	X-Coordinates of gas sensors
<u>GasY</u>	int	24	Read	Y-Coordinates of gas sensors
<u>WasserX</u>	int	16	Read	X-Coordinates of wasser sensors
<u>WasserY</u>	int	16	Read	Y-Coordinates of wasser sensors

# Java GUI Client

- Uses TINE API to receive data from Device Server and from the local/central archive
- Uses ACOP for graphical representation of:
  - Active alarms (blinking and/or coloring labels)
  - Accepted alarms
  - Table of active alarms
  - Current gas concentration for a given gas alarm
  - History data for a given gas for a given time period
- In operating/expert mode enables to accept or reset alarms
- In expert mode enables to change:
  - Alarmlevels
  - Coordinates of sensors

# Resume

- This project uses many of powerful possibilities which TINE gives and about which many of you have spoken during these 2 days.
- Based on TINE, the project allows to hope, that it can be used for other alarm/info systems without significant changes.

**- Thank you for attention-**
